

Astaro Web Gateway Overview

In many companies, Web 2.0 typically means security level 0.2. Employees routinely access their regular web applications from their work stations and exchange data packets over Instant Messaging programs, therefore creating new scenarios of abuse. Popular web applications do not only reduce the productivity of daily work processes, but can also potentially lead to serious legal consequences. Astaro Web Gateway serves to effectively protect from web-based attacks, provides maximum functionality through minimal effort and accommodates a spectacular price-performance ratio. With this "All-in-One" appliance, IT administrators are easily able to:

- **Filter web access:** Grant web access-based on 96 easy-to-navigate categories with user- and time-based policies.
- **Detect malicious code:** Perform fast, accurate scanning for viruses, spyware and active content, providing unmatched detection rates via two scan engines.
- **Control IM/P2P applications:** Steer and manage access and use of all IM and P2P applications including Skype.
- **Manage bandwidth:** Orchestrate and prioritize bandwidth for important business applications.

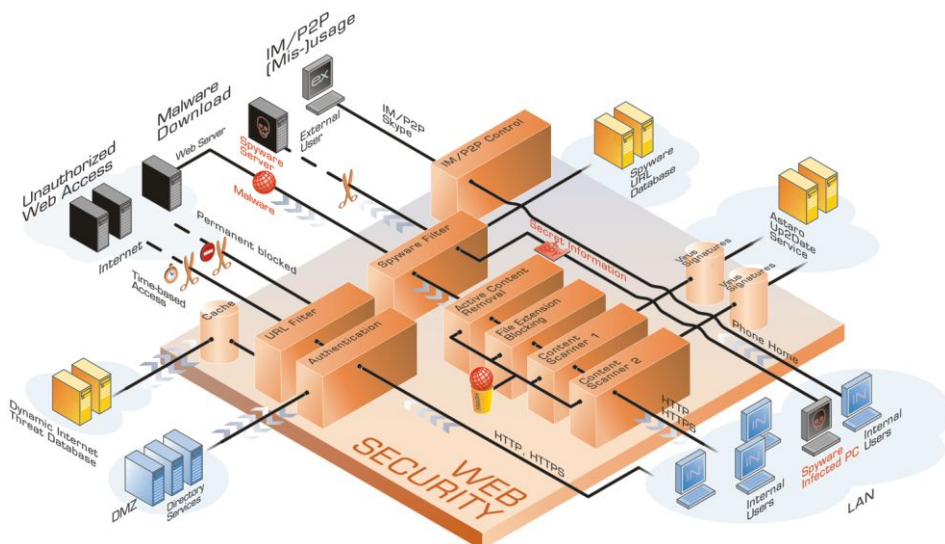

Benefits

Comprehensive Security

- ▶ Reliably blocks malicious content within HTTP, HTTPS and FTP traffic
- ▶ Dual Antivirus protection prevents infection from web surfing, downloads and web-based emails
- ▶ Extensive virus signature database with over 800,000 patterns
- ▶ Granular IM/P2P control per application
- ▶ Spyware communication is blocked from already-infected PCs

Easy to Manage

- ▶ Browser-based graphical user interface
- ▶ Real-time automatic update of firmware and attack patterns
- ▶ Extensive web security reports with PDF & CSV support
- ▶ Single Sign-On support of eDirectory and Active Directory for transparent authentication
- ▶ Deploys anywhere in the network

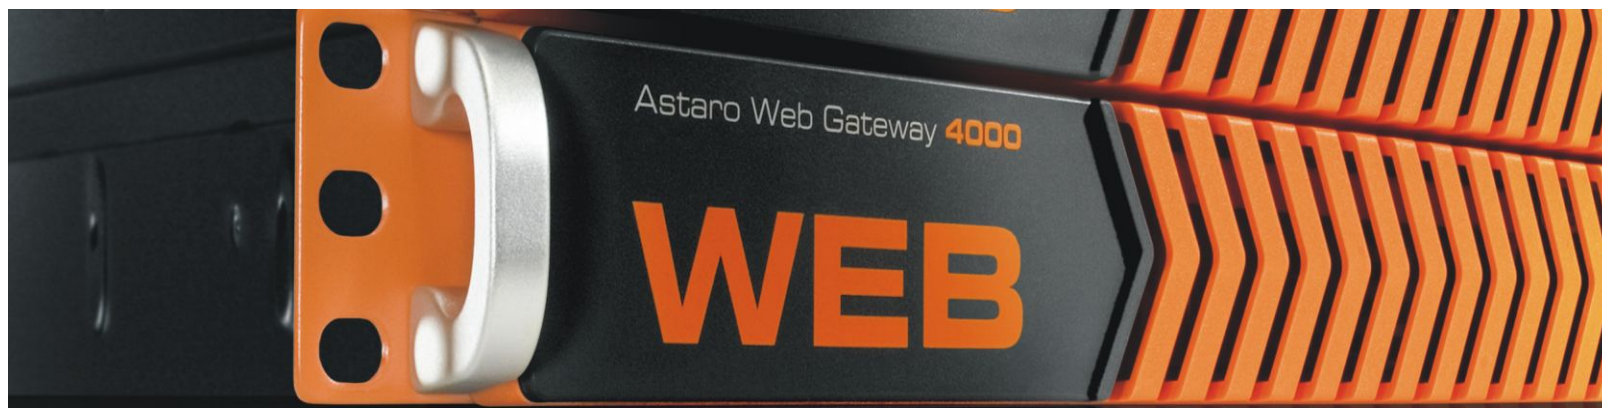

A powerful suite of integrated tools

The Astaro Difference

- ▶ Only Astaro appliances are available in three different types: as hardware, software, and virtual appliances. Integration into existing infrastructures has never been easier.
- ▶ Nobody's faster: With Astaro's "10-Minute Setup" every installation is completed rapidly.
- ▶ Nobody's more flexible: Astaro's "One-Click Clustering" technology enables scalable performance and system stability with up to ten cluster nodes.
- ▶ Over 47,000 customers are already protecting their networks with an Astaro appliance.

Web Security Reporting

Astaro Web Gateways are equipped with one of the most extensive logging and reporting systems available on any security product today. Every website visit, download and IM/P2P usage is fully stored in a self-archiving system, allowing Astaro to then extrapolate data into useful reports directly on the gateway.

► **In-line reports** offer up-to-date statistical information through more than thirty detailed reports, updated every fifteen minutes. These help identify top web, application and bandwidth usages per user or domain. These reports offer fully detailed breakdown of surfing activities by IP address or user name as well as complete listings of blocked domains, URL categories, viruses and file extensions.

In-Line reports offer a detailed breakdown of surfing activities

► **Reporting graphs** provide daily, weekly, monthly and yearly overview statistics about the utilization of hardware components such as CPU, RAM, hard disk, and network interface usage.

► **Executive report** includes summary information taken from both the In-line reports and the reporting graphs. They can be generated on demand and also emailed out to a list of users on a daily, weekly or monthly basis.

Security Features - Details

- | | | | |
|---|---|--|---|
| <ul style="list-style-type: none"> ‣ Dual antivirus engines operate with two independent databases with over 800,000 patterns ‣ Blocks incoming and outgoing spyware traffic, preventing infection and hidden communication ‣ Blocks file formats defined within blacklists ‣ Blocks the hidden installation of active content like Java, Active X, Flash, Cookies, VBScript, JavaScript within the user's desktop ‣ Content scanning capability for files over 40 MB ‣ Automatic real-time update of firmware and virus patterns and signatures, through real-time check with Astaro's Up2Date server ‣ Time-, user- and user-group-based access policies | <ul style="list-style-type: none"> ‣ HTTP, HTTPS and FTP proxy with full transparent mode support ‣ Transparent web proxy cache enables faster response times, even with low speed Internet uplinks ‣ URL filtering technology controls employee web access, with over 35 million websites across 96 categories ‣ Uses comprehensive URL database with international content in more than 65 languages ‣ Daily update of newly-discovered websites maximise coverage ‣ Integrated user database, Active Directory, eDirectoryRadius, Tacacs+ and LDAP authentication ‣ Windows Server 2008 Native Mode support | <ul style="list-style-type: none"> ‣ Active Directory and eDirectory integrated with single sign-on ‣ Instant Messaging and Peer-to-Peer control: AOL IM, ICQ, MSN Messenger, Yahoo! Messenger, IRC, Google Talk/Jabber, Skype, Bittorrent, Edonkey, Gnutella, WinMX, Winny, Manolito, Ares and Direct Connect ‣ Granular IM/P2P Control with exceptions-based on User/IP addresses, QoS for IM/P2P protocols ‣ Skype blocking, alerting and bandwidth shaping ‣ Support for UTF-8 ‣ Server load balancing ‣ Customizable end-user messages | <ul style="list-style-type: none"> ‣ Active/Passive (Hot Standby) and Active/Active (Clustering) HA, without the need of load balancers ‣ Integrated graphical reports offering comprehensive information about web-usage by user and domain, blocked web categories, detected/blocked viruses ‣ Reporting with built-in PDF & CSV Export options ‣ Daily executive reports (HTML or PDF) delivered by email ‣ Archiving of executive reports ‣ Anonymization of reporting data to enforce privacy policy ‣ Simple management in web browser ‣ Setup wizard and online help |
